Design 606 For Elevator .....

These cars are constructed of the highest quality full finished stretcher leveled furniture steel, the wainscot and canopy are of 14 gauge and the ceiling is of 12 gauge, all properly reinforced. All joints are of light proof construction with concealed fastenings. The canopy is built as one unit with welded corners. The ceiling has an exit to comply with code.

Perforated grilles, with louvers on shaft side, provide ventilation for the cars. The grille in Design 605 is finished in bronze enamel with a stenciled ornament.

The light fixture is one of our standard designs. Other designs are available for a small extra.

The cars are finished with enamels, in colors to be selected, with 4" of wainscot finished black to serve as a base. The exterior is finished black.

#### RECOMMENDED ACCESSORIES

Entrance columns in various metals — certificate frame — combination fan and light fixture — handrail — collapsing gate — car doors — protection pads — operator seat — hall view mirror.
